

GETTING STARTED WITH **GALAXY**

Advanced Education in Decentralized Finance

Overview: Galaxy is a self-guided, comprehensive course designed for those who don't know anything or have a basic understanding of cryptocurrencies and DeFi. It delves deeper into how to actively participate and potentially profit in the DeFi space.

-

Content: The course includes advanced topics such as smart contract basics, yield farming, liquidity provision, and risk management strategies. It also explores various DeFi platforms and tools, offering practical insights on how to engage effectively and responsibly in the market.

-

Features: Hands-on tutorials, real-world case studies, and access to a community forum for discussions. Expand your knowledge and start applying DeFi strategies for potential financial gains.

-
